

In 2025 we have two sets of accounts prepared because we undertook a significant update to our governance, including creating new Articles of Association. This process required us to bring all our records and procedures up to date, ensuring they are modern, in line with current good practice and accurately reflect how we now operate.

The transition involved reviewing and reconciling our financial records across two accounting periods, which was more complex and time-consuming than anticipated. There were some issues at the accounting office and as a result, our submission to OSCR was delayed. We apologise for this and want to assure you that these changes were made to strengthen our organisation's transparency and compliance and we are committed to timely submissions in the future.

Copies of our accounts can be viewed here: [Oct 2024 - March 2025](#)
